## **Information for Institutional investors**

Whether you are an insurance company, a bank or a fund of funds: Membership in BVK offers institutional investors many attractive opportunities for networking and getting involved.

Since we represent the interests of the private equity industry in Germany, the largest portion of our members are private equity companies – from venture capital and growth financing to buy-out specialists – but our membership also includes consultants and institutional investors.

Benefits of your BVK membership include: Direct and institutionalised contact to practically all private equity companies in Germany,

- Access to extensive statistics about the PE industry in Germany, with individual preparation of data by request,
- Integrating your interests into the BVK agenda,
- Opportunities for direct communication with other institutional investors – organised by BVK.

BVK is a voice that is heard. Every new member makes that voice louder. [Find out more...](#)
